Unified Fabric is a render farm, sound piece and collection of video works.

This project has been initiated by Arcadia Missa for the '(networked) every whisper is a crash on my ears' programme - stemming from previous work and conversations with Sanderson, and specifically his text, 'Human Resolution', for Mute Magazine, 2013.

A render farm is a super computer, typically used for rendering Hollywood animations, the 'farm' in Unified Fabric is self-built by the artist.
